additional brochures and
registration forms**

Are you in compliance with the new NPDES E&S Certification Laws?

In 2003, HB285 amended the Georgia Erosion and Sediment Control Act of 1975. These amendments included a groundbreaking mandatory certification program for all individuals involved in land disturbing activities in Georgia.

The new Georgia Erosion and Sedimentation Control Law states that all persons involved in land disturbing activities must be trained and state certified no later than December 31, 2006. Depending on your level of involvement in the land disturbing process, you or several of your employees will probably need to attend a Level IA or Level IB course and successfully pass a formal examination.

By December 31, 2006, you will be required to have at least one person on-site from each entity involved with land disturbing activity who is certified by the Georgia Soil and Water Conservation Commission.

The following website has more detailed information on the certification requirements for persons involved with land disturbing activities: www.gaswcc.org

- You must register for and attend a Conservation Commission approved and posted "Fundamentals Seminar" (Level IA)
 - You must submit the appropriate certification application (distributed before the exam).
- ### Eligibility Requirements for Level IA Certification "Certified Personnel"

Erosion and Sedimentation Certification (Level IA) Fundamentals Seminar

The Level IA Fundamentals Seminar is a one-day course designed to train contractors, builders, developers, site superintendents, grading and utility contractors, and monitoring consultants in the proper installation, maintenance, and inspection of BMPs on construction sites.

Topics covered in this course are fundamentals of erosion and sediment control, the Georgia Erosion & Sedimentation Act, NPDES Permits, field maintenance, stream buffers, vegetative and structural BMP practices.
